

## POS Systems for Independent Retail Stores

Our mission is to provide the **independent retailer** a one-stop shopping destination for all its POS needs. We believe our choices of software and hardware provide state-of-the-art features at affordable prices. Our software is a true "cash register" replacement, providing small retailers with powerful and intuitive inventory control solutions. Our POS systems are designed for a wide variety of independent retail stores, with a focus on stores that buy, sell, trade and rent inventory.

- **Buy, Sell, Trade and Rent**

A complete retail solution for stores handling new and used products. Ring up sales, trade-ins, and rental items on the same invoice!

- **Interface with Industry Databases**

Save a great amount of data entry time by pulling information from the VPD database or subscribing to the BRE database, which supplies used selling prices and trade-in values for both the complete and incomplete versions of games! The databases also populate common fields such as title, publisher, and UPC code.

- **Power Over your Inventory**

Know your exact inventory levels. Automatically fill out purchase orders for low stock items. Keep your stock levels of new and used items at the level YOU want!

- **Improve Customer Care**

Speed up your transactions. Suggest used product instead of new in order to increase your profit margins. Have a quick, accurate lookup to see if an item is in stock. Make your customers feel as though they've gotten the highest quality of service possible!

- **Keep Track of your Customers**

Your current customers are your most likely future customers. Keep a mailing list of them. Keep accounts for a credit line, or for store credit from trade-ins. Make occasional mailings of special offers to bring them back to your store.

As shown above, you can do multiple transaction types on a single transaction. Sell new and used, take trade-ins, sell pre-orders, and rent, all at once!

**Used <<<**

**Used Condition**

**Trade-In**

**Store Credit**

**Cash**

Extreme POS is built from the ground up to allow for used products and trade-ins; simply check the boxes next to the item number field to use one of these transaction options.

**Used Info**

Used In Stock:  Trade In Price 1:

Used Cost:  Trade In Price 2:

Used Max:  Trade In Price 1 (Cash):

Used Price 1:  Trade In Price 2 (Cash):

Used Price 2:

No need for setting up separate departments; ExtremePOS will keep used pricing and stock levels on an item separately. Set multiple trade-in values for complete or incomplete products and for store credit versus cash!

**Used Item Available**

This item is available Used for \$14.95 or \$10.95 (based on condition).

Does the customer wish to purchase Used rather than New?

Condition:

Have the system aid you in selling your highest margin items – the POS system can alert you if you are selling a new copy of something you have in stock used.

**extremePOS**

Accepting this trade-in will exceed the maximum used quantity you have set for this item.  
 The Used in stock quantity is: 3  
 The Used maximum quantity is: 3  
 Do you still want to accept this trade-in?

You may also have the system alert you to when you are getting too many copies of a game in. This will prevent you from getting dozens of copies of an overhyped bomb in stock, wasting money and space.

**Invoice <<<**

# Items:  Tax Exempt:

Discount (Ctrl+D):  %

Apply Promotion Prices:

Put On-Hold:  All Trade-ins Store Credit:

Recall On-Hold:  All Trade-ins Cash:

Easily switch back and forth between giving store credit and giving cash with these invoice controls. You may also hold multiple transactions, allowing customers to see the total of their trade-in before doing their shopping.

Use quick importing – scan an item that you haven't entered into inventory, and you'll import the pricing, title, and other information from your industry database.

**BRE Database Manager**

Adjust BRE Pricing

Used Price Percent: 100

Trade-in Price Percent: 100

Update Store Database

Update my Trade-In Prices

Update my Used Prices

Use the BRE Manager to update your copy of the BRE database. (VPD has a similar program.) You can adjust prices in the BRE database to account for regional differences, view what prices have changed, and update the prices in your inventory based on the new BRE pricing!

**BRE Database**

Username:

Password:

The BRE database is an additional charge for ExtremePOS users and contains used and trade-in pricing for video games; the VPD database is currently free to ExtremePOS users and contains new pricing for both video games and for DVDs.

**Gift Card**
